FOREWORD

Message from the Founder

> ***Tax compliance should never feel like a maze. It should feel like a conversation with someone who has your back.***

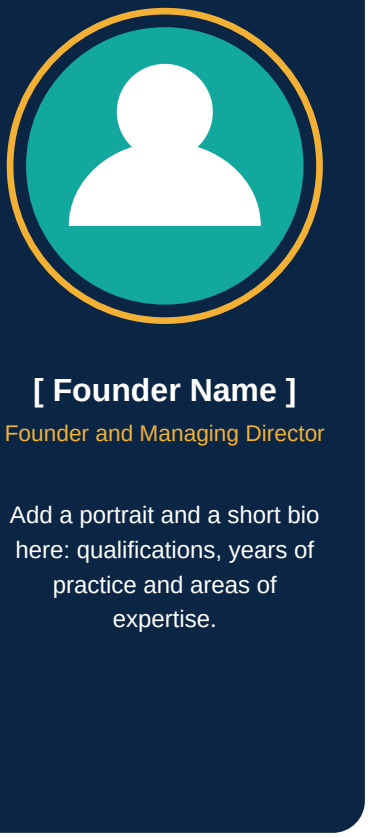

When we started SetupFiling.in, our idea was simple. Too many individuals and business owners lose time, money and peace of mind because tax rules are complex and the process is opaque. We set out to change that.

Today, our team of tax professionals, accountants and compliance specialists serves clients across India with a promise of accuracy, transparency and timely delivery. We combine deep technical knowledge with secure digital workflows, so that you can file, plan and grow from wherever you are.

This profile introduces who we are, how we work and what you can expect when you partner with us. I invite you to explore our services and speak with our experts. We would be honoured to be your trusted tax and compliance partner.

With warm regards,

ILLUSTRATIVE CASE STUDY

Case Study: Startup

From incorporation to investor-ready compliance

CLIENT PROFILE Early-stage technology startup, Delhi NCR

The Challenge

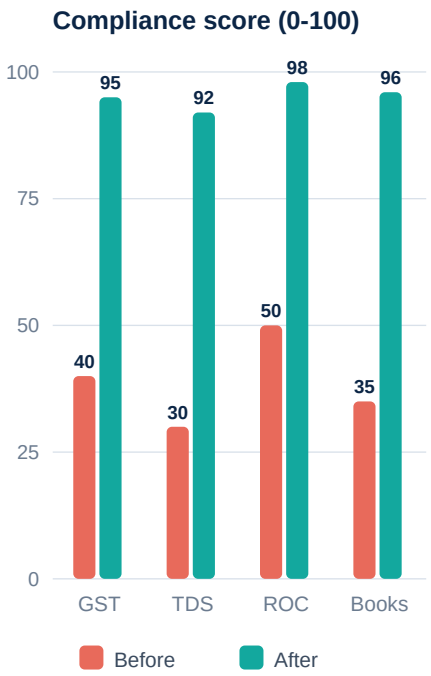

Founders had incorporated a private limited company but lacked bookkeeping, had GST returns pending and were unsure of ROC and TDS obligations ahead of a funding round.

Our Approach

We cleared pending GST filings, set up cloud accounting, mapped the full compliance calendar, regularised TDS and prepared statutory registers and annual filings under a monthly retainer.

The Outcome

Within a short period the startup moved to a clean compliance record, with audit-ready books and an investor-ready compliance pack that supported due diligence.

ILLUSTRATIVE CASE STUDY

Case Study: GST Notice

Resolving an input tax credit mismatch

CLIENT PROFILE Trading business, multi-state operations

The Challenge

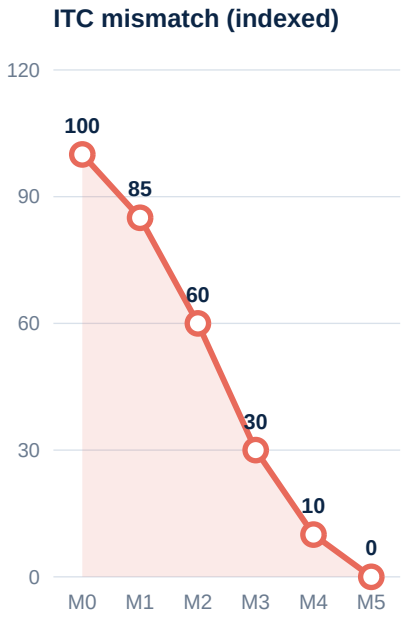

A notice questioned excess input tax credit claimed compared to supplier-reported data. The owner feared a heavy demand with interest and penalty.

Our Approach

We reconciled purchase books with GSTR-2B, identified supplier-side filing gaps, followed up with vendors, and filed a documented reply with supporting evidence in time.

The Outcome

The mismatch was substantially resolved and the demand was dropped. A monthly reconciliation routine now prevents recurrence.

ILLUSTRATIVE CASE STUDY

Case Study: NRI Property

Property sale, tax efficiency and repatriation

CLIENT PROFILE Non-resident Indian selling inherited property

The Challenge

The buyer deducted TDS at a high rate on the full sale value. The client needed to claim exemptions, reconcile the tax and repatriate sale proceeds abroad.

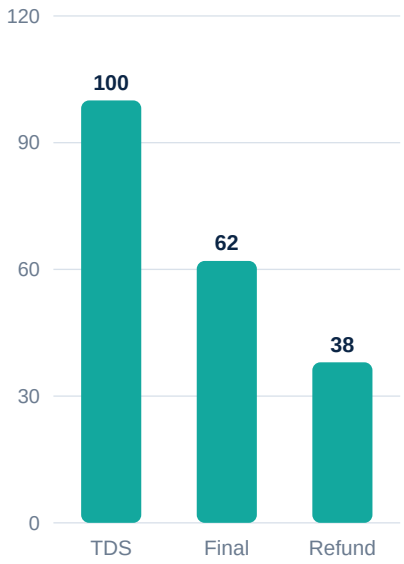

Our Approach

We determined residency, computed capital gains with indexation where eligible, prepared the return, claimed the refund of excess TDS and supported Forms 15CA and 15CB.

The Outcome

The excess tax withheld was refunded after assessment and the client remitted funds abroad in compliance, with clear documentation for both countries.
